Company:

BOOMI is a platform for everything related to sustainability. Today, BOOMI has gone from being simply a brand to becoming a complete platform. Our platform is home to various local, credible, purpose-driven businesses covering people's sustainability needs, information, and services.

BOOMI's vision is to build China's largest and most trusted ecosystem for all things sustainability in mainland China. Our mission is to make eco-friendly living simple and empower people to make a positive difference every day.

BOOMI started with bamboo toothbrushes, we wanted to build something that was simple yet powerful. After realizing the good impact, it could have on people's daily lives and, on the planet, the selection of BOOMI products grew much more.

The word "boomi" comes from the Indonesian word "bumi", which means earth. We are more than a company with great brands, we are a complete community and platform to connect and inspire people to make a difference in the world, step by step. How will you help make this change?

Non-profits:

As part of our BOOMI Forest Initiative, we are committed to contributing 8.8% of our total revenue to planting trees in Inner Mongolia. This project is designed to improve both ecological and humanitarian conditions there. It also encompasses true capacity building as the local population is intimately involved with, and benefits from, every step of planting, maintaining and monitoring the trees.

Kim-Boebel | Board of Directors

Over 25 years of manufacturing high-quality customized furniture, our company understands each customer's unique requirements in styles and materials. We provide the professional advice about the wide range of furniture designs as well as the technical possibilities and the limitations of furniture designs.

MAWOOX is producing mainly the standing-alone and built-in furniture pieces in the living space. We secure our quality by using high-quality raw materials e.g. hardwood from the US imported, high-grade plywood and veneer (no MDF), premium hardware brands of Blum (Austria) and Hafele (Germany), non-toxic leach-out water-based surface treatment, and stainless steel in various color tones from brass to titanium.

Besides the new furniture production, we renew the furniture. Once the renewal is done, those beloved vintage furniture pieces become quasi-new furniture but still maintaining the original structure and the special attachments of the customers.

Having long-term cooperation with several award-winning design institutes shows MAWOOX high standard of quality and service. Numerous private expats customers have been using our furniture and the most of them are returning customers or recommended by other customers.

The MAWOOX signature quality is made by the close hand-in-hand collaboration between the CUSTOMER and MAWOOX TEAM in shaping process.

Creative Director | Manager

WOVEN TALES has been founded by Annika, Ahmad and Siavosh Zabeti in 2012. Dedicated to the discovery and creation of unique handmade Persian carpets, it was voted "Best carpet brand" by ELLE Decoration magazine in 2016.

Ahmad's relationship to carpets has deep emotional roots: He is from the third generation of a family of carpet dealers. His grandfather started exporting the first unique pieces outside Iran's borders in 1938. When he was just a young boy, Ahmad and his father used to visit carpet weavers in Iran. His passion was born and he then never stopped working on enhancing this heritage.

Siavosh (creative director at Apple Inc. San Francisco since 2014) and Annika (textile designer) have taken over the artistic direction of the contemporary collection of WOVEN TALES, combining a pure modern style with ancestral Iranian know-how.

Interior design enthusiasts, Annika and Ahmad study the taste and expectations of their customers in order to accompany them in their choice and create an atmosphere with a unique touch in their home.
